**Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)**  
(application filed on or after May 29, 2000)

The patent term adjustment to date is 195 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 195 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

**Notice of Fee Increase on January 1, 2003**

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims a venting plug for use with a wet, lead-acid electric storage battery comprising a container and a cover defining at least one cavity, the cover defining at least one cylindrically shaped process hole associated with the cavity, the plug being adapted for insertion into the process hole to provide gaseous communication between the cavity and the atmosphere, the venting plug comprising a housing having a cylindrical plastic body and a top, the body being molded of plastic and having an axis, a coupling portion having an outer surface, the coupling portion comprising at least a portion extending in a plane disposed at an angle to the axis, the outer surface of the coupling portion displaying at least one mold parting line that does not extend in a plane perpendicular to the axis, and an outer sealing portion, the sealing portion comprising an outer annular sealing surface, the sealing surface displaying no mold parting line.

Applicant claims a wet, lead-acid storage battery, comprising a container and a cover defining at least one cavity, the cover defining at least one cylindrically shaped process hole associated with the cavity, the plug being adapted for insertion into the process hole to provide gaseous communication between the cavity and the atmosphere, the venting plug comprising a housing having a cylindrical plastic body and a top, the body being molded of plastic and having an axis, a coupling portion having an outer surface, the coupling portion comprising at least one coupling flange, at least a portion of the coupling flange extending in a plane disposed at an angle

Art Unit: 1745

to the axis, the outer surface of the coupling portion displaying at least one mold parting line that does not extend in a plane perpendicular to the axis, and an outer sealing portion, the sealing portion comprising an outer annular sealing surface, the sealing surface displaying no mold parting line, a seal disposed adjacent the sealing surface and elastically deformable between the sealing surface and the process hole.

The Applicant claims a method of producing a venting plug for use with a wet, lead-acid electric storage battery comprising a container and a cover defining at least one cavity, the cover defining one or more cell cavities, the cover defining cylindrically shaped process holes associated with each cell cavity, said venting plug adapted for insertion into the process holes to provide gaseous communication between the cell cavities and the atmosphere, the method comprising the steps of providing a mold for molding a substantially cylindrical venting plug body, the mold having an upper half and a lower half, the lower half comprising a solid plate for forming at least one sealing surface of the plug body without a parting line and at least one slideable component for forming at least one coupling flange along a peripheral surface of the venting plug body, molding a venting plug body having at least one sealing surface and a coupling flange, opening the mold, and ejecting the venting plug body from the mold, the venting plug body having a sealing surface that displays no mold parting line.

Applicant claims a mold for molding the body of a venting plug for use with a wet, lead-acid electric storage battery comprising a container, a cover, the container and cover defining at least one cell cavity, the cover defining a cylindrically shaped process hole associated with the cell

Art Unit: 1745

cavity, the venting plug having a body having at least one sealing surface adapted to receive a seal and to be inserted into the hole to provide gaseous communication, the body having at least one flange, the mold comprising an upper half and a lower half, the lower half comprising a solid plate for forming the sealing surface on the venting plug body whereby the solid plate does not result in a mold parting line in the sealing surface.

In the prior art of record, Geibl et al., U.S. Pat. No. 6,143,438, teach a vent cap system for a battery which includes a flange for forming a fluid tight seal. Hakarine, U.S. Pat. No. 6,146,784, teach a venting system for a lead-acid battery having vent plugs which provide a seal molded onto the vent body. Adams et al., U.S. Pat. No. 5,422,199, teach a lead-acid battery having a venting system comprising a venting plug in each process hole.

However, the prior art of record do not disclose a vent plug comprising a coupling portion having an outer surface, the coupling portion comprising at least a portion extending in a plane disposed at an angle to the axis, the outer surface of the coupling portion displaying at least one mold parting line that does not extend in a plane perpendicular to the axis, and an outer sealing portion, the sealing portion comprising an outer annular sealing surface, the sealing surface displaying no mold parting line. Additionally, the prior art of record do not disclose a method of producing a venting plug for use with a wet, lead-acid electric storage battery comprising steps of providing a mold for molding a cylindrical venting plug body, the mold having an upper half and a lower half, the lower half comprising a solid plate for forming at least one sealing surface of the plug body without a parting line and at least one slide for forming at least

Art Unit: 1745

one coupling flange along a peripheral surface of the venting plug body, molding a venting plug body having at least one sealing surface and a coupling flange, opening the mold, the venting plug body having a sealing surface that displays no mold parting line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
